**Trafikverksskolan
supports your progress**

Trafikverksskolan

The mission of Trafikverksskolan is to educate the transport engineers, technicians and managers of the future. We offer the latest technical courses in both the road and rail sectors and also provide all of the internal training courses for Trafikverket.

Each year we educate approximately 8000 people across our range of nearly 500 courses. You can be fully assured that these always are up to date concerning the latest directives, laws and regulations.

Technical education and training to the road and rail industry

At Trafikverksskolan, we run a diverse selection of courses to cater for all of your training requirements. Thanks to our experienced, knowledgeable teachers, comprehensive training facilities and excellent partners, Trafikverksskolan sets the standard in technical training. We constantly strive to improve our courses further and adapt them to meet the requirements of our customers, taking into account the challenges and opportunities that new technologies provide. In

our existing portfolio, we can provide all the safety critical courses required to work on track and we also offer an extensive range of courses within the electrical, signalling and telecommunication disciplines and driver training amongst others areas.

Internal training for Trafikverket...

...is all delivered by Trafikverksskolan. In addition to our technical training, we also offer a variety of courses in fields such as leadership, project management, IT and media relations.

For those who see a career within rail...

...Trafikverksskolan offers high level railway qualifications, including degree level courses. For example, this includes YH railway technicians, B.Sc in railway engineering as well as the fourth high school graduate year. These courses are well recognised within the transport industry and can open up a wealth of exciting career opportunities.

Customer requirements are one of our core values

More detailed information on all of our courses can be found by visiting www.trafikverksskolan.se However, Trafikverksskolan is also able to create bespoke courses based on the specific needs of our customers if requested, including the content, timings, location and methodology. We work closely with our clients to ensure our goals are aligned and deliver the best results.

Our aim is to be the market leader in transport education and training, developing the staff of our customers and thus improving their business.
